

Flame Resistant Elements™ Jacket USAF (FR)

Stay warm, protected, and comfortable in some of the world's harshest climates. Worn by thousands of USAF aviators, this design prioritizes fit and lightweight functionality for a jacket that performs when you do. The integration of two high-tech softshell fabrics provides fleece-lined warmth on the upper torso and sleeves, and reduces bulk in the lower torso. A windproof, waterproof, and breathable membrane helps keep rain out without trapping sweat. Tactical features such as zippered shoulder and forearm pockets provide easy access to gear.

The exterior of this jacket features Massif's® proprietary flame-resistant technology and won't support combustion in flash fire scenarios. The jacket's fleece lining features Massif Flamestretch® and is constructed with DuPont™ Nomex® brand fiber. Engineered with Massif's proprietary knitting and finishing technology, Flamestretch provides built-in flame resistance, proven durable performance, and comfort from the inside out.

FEATURES

- ✦ FULL FLAME-RESISTANT CONSTRUCTION WITH PROPRIETARY MASSIF® FABRICS
- ✦ 4-WAY-STRETCH FABRIC
- ✦ SOFTSHELL FABRIC FEATURES WINDPROOF, WATERPROOF, AND BREATHABLE MEMBRANE
- ✦ HIGH FLEECE-LINED COLLAR FOR WARMTH AND PROTECTION
