

Flame Resistant Elements™ Jacket Tactical (FR)

Massifs® Elements™ Jacket incorporates on-the-job feedback from our customers for the best fit and functionality possible. The triple-layer fabric construction features a fleece-lined interior, abrasion-resistant exterior, and windproof, waterproof, breathable membrane that keeps rain and snow out but won't trap moisture when you're working up a sweat. Sized to fit comfortably over uniforms.

Constructed with DuPont™ Nomex® brand fiber - the first flame-resistant fiber selected for use in military uniforms. Nomex fibers carbonize and thicken when exposed to the intense heat of a flash fire, creating a protective barrier that reduces or prevents burn injuries.

FEATURES

- ⇨ Full flame-resistant construction with proprietary Massif® fabrics
- ⇨ 4-way stretch fabric
- ⇨ Elements™ softshell fabric features windproof, waterproof, and breathable membrane
- ⇨ High, fleece-lined collar
