

Flame Resistant Altitude™ Softshell Pant (FR)

The Massif® Altitude™ Softshell Pant is highly breathable, flame-resistant outerwear designed for fast and light movement in cool to cold environments. Made with our revolutionary new SABA™ fabric, a two-layer laminate that blends proprietary FR processes with unique knit structures, the Altitude Softshell Pant is a cutting edge garment providing exceptional comfort, durability, and performance in one streamlined package. Massif's SABA fabric is lightweight making it perfect with a base layer and as part of an advanced layering system. The proprietary nylon face has an extremely smooth hand, adding to its comfort and enabling quiet operation. Providing 3 season functionality, the Altitude Softshell Pant is a steady foundation for your cold weather system.
